

INDENTED HEAD WOODLAND NATURE RESERVE

FINAL ENGAGEMENT SUMMARY

Feedback on the Indented Head Woodland Nature Reserve Draft Master Plan has closed. Thank you to everyone who provided feedback, your contribution is valued and appreciated. This stage of the community engagement was to seek your feedback on the Draft Master Plan. We asked if *'we have captured your thoughts: have we missed anything'* from the first round of engagement.

Community feedback is a vital part of our planning. It helps us to make decisions to ensure the Indented Head Woodland Nature Reserve remains a natural, beautiful, and inviting place that meets the needs of the local community.

Over the course of both consultation periods the City reached the following achievements.

69 DAYS

total
engagement

1500

WHAT YOU TOLD US

“Agree wholeheartedly with the Values, Experiences, and Goals. Support the placing of a Trust for Nature Covenant onto the Reserves.”

“How much human interaction is deemed to be needed to have a reserve protected by Council, Surely we can allow nature to have some places without people trampling through it.”

“I’m excited that the aim is to preserve what is left, and to raise awareness and the collaboration with the traditional owners of the land”

“Strongly support the long boardwalk at the southern end of the Reserve, no other solution as this area is low and regularly flooded after rain but needs railings for safer walking for all abilities.”

“The effort being made to try and conserve one of the remaining remnant scrub and bush on the peninsular”

NEXT STEPS FOR THIS RESERVE

All feedback received has been considered with the Final Master Plan being presented to Council in October 2022 for adoption.

The Master Plan will then be implemented through a series of events over several years.

This will incorporate the construction activities that are required to enable the community to enjoy the reserve and protect the flora and fauna of the reserve.
